-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the term "said" appears in the specification. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The following claims are vague, indefinite, awkwardly and confusingly worded:

- i. "it" claim 1, lines 10& 12. The limitations need to be positively recited with the proper antecedent basis.
- ii. "it" claim 3, line 1, The limitations need to be positively recited with the proper antecedent basis.

- iii. "it" claim 4, line 1, The limitations need to be positively recited with the proper antecedent basis.
- iv. "it" claim 5, line 2, The limitations need to be positively recited with the proper antecedent basis.
- v. "it" claim 6, lines 1 and 4, The limitations need to be positively recited with the proper antecedent basis.
- vi. "it" claim 7, line 2 The limitations need to be positively recited with the proper antecedent basis.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirse (6854150) in view of Footer et al (6058548).

b. Hirse discloses a cleaning device having a domestic cleaning device comprising: a staff-type structure (1); joined to the end of said staff-type structure (5) a central element-(4) of a base (5) which comprises two lateral portions (5) which are joined to said central element-(4); resilient members that tend to open out said lateral portions; a fork member (11) with a tubular extension (10) which can be slid along said staff with the aid of

a grip (the other end of 1) said fork member(11) having inner profiles. In regard to claim 6, staff (1), assembly (10), angular fastening (1a), sleeve (a portion of 1).

c. Hirse does not disclose means for attaching and releasing a replaceable assembly.

d. All of the claimed elements were known in the prior art as shown by Footer et al discloses a cleaning device having a means for attaching (200 a-d) and releasing a replaceable assembly (131A) and a sponge (126) which allows the sponge to be changed and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions and the combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention.

Allowable Subject Matter

6. Claims 2 and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art being made of record.
